***Allowable Subject Matter***

The following is an examiner's statement of reasons for allowance:

- The primary reasons for allowance for claims 1-15 and 18-19 are the inclusion of the limitations of a printing method comprising the steps of feeding a printing medium at a varying relative velocity between nozzles and the medium, the relative velocity having an average exceeding a threshold velocity and periodically having a value less than the threshold velocity and selectively acting one or more nozzles when the relative velocity is below the velocity. It is these limitations, either alone or combined as claimed, that have not been found, taught, or suggested by prior art.
- The primary reasons for allowance for claims 16-17 are the inclusion of the limitations of a printing apparatus comprising a feed for advancing a print medium past a plurality of nozzles at a variable relative velocity, the relative velocity alternating between a first velocity higher than a threshold velocity and a second velocity lower than the threshold velocity, and a controller to selectively activate the nozzles when the relative velocity is lower than the threshold velocity. It is these limitations, either alone or combined as claimed, that have not been found, taught, or suggested by prior art.
